Brightpath Software - Information Security Policy

This policy applies to all employees, contractors and systems of Brightpath Software, a fictional company.

Accounts and passwords

Passwords must be at least 14 characters long and must be stored in the company password manager. Multi-factor authentication (MFA) is mandatory for every account that supports it. Shared accounts are prohibited.

Devices

All laptops must use full-disk encryption. Screens must lock automatically after 5 minutes of inactivity. Lost or stolen devices must be reported immediately.

Incident response

Report any suspected security incident to security@brightpath.example within 1 hour of discovery. The security team responds to Severity 1 incidents within 15 minutes, around the clock.

Data retention

Customer application logs are retained for 13 months and then deleted. Database backups are retained for 35 days.

Access control and vendors

Access rights to production systems are reviewed quarterly by system owners. Vendors that process customer data must hold a current SOC 2 Type II report.
